STEEL
BLADE**

1-Inch Mini Glass Scraper with Six Stainless Steel Blades

- Heavy-duty multi-purpose scaper
- Compact for reaching tight and narrow spaces
- Scrapes toughest materials like adhesive, dirt, paint and more

SMALL IN SIZE. BIG IN POWER.

When you need to take on a tough scraping job, reach for this powerful Mini Scraper.

The GSR-2 features a tough, fiberglass reinforced handle with a wraparound anti-slip grip that gives users added comfort and blade control. The keyed blade stays firmly in place even under excessive pressure to give this scraper the ultimate in clean-up power.

A tool-free blade change makes changing blades simple and fast. The handy blade storage container comes with six rust- and corrosion-resistant stainless steel blades. The container conveniently snaps into the handle when the tool is in use and doubles as a blade cover as needed.

The larger tethering hole can be used to hang the tool at your workbench or in your truck and helps avoid loss. The signature OLFA yellow makes it easy to find on the jobsite or in your truck.

Use this mini powerhouse to take on adhesives, dirt, paint, caulk, mortar and more.
