25% SHARPER
THAN STANDARD OLFA BLADES™

Aluminum Body Heavy-Duty Utility Knife

- Sturdy die-cast handle
- Ultra-Sharp Black Blade
- Oversized grip

18mm
3/4"

SHARPER. FASTER. STRONGER.

Upgrade your blade with the new X-Design Series Die-Cast Aluminum Heavy-Duty Utility Knife. This rugged knife starts with our Ultra-Sharp Black Blades designed to be 25% sharper than standard silver blades. With eight sharp edges per blade and a tool-less blade change, the MXP-series will keep you working faster throughout your day.

The sleek die-cast aluminum frame is contractor tough. This knife features a stainless steel blade channel that runs the full length of the knife to support heavy-duty cutting all day. And the wraparound anti-slip grip delivers comfort with added user control.

Available with either a slim auto-lock or solid metal ratchet lock, the MXP allows users fast blade activation and a secure hold on every cut.

Backed by the OLFA Limited Lifetime Warranty, the Aluminum MXP is sure to be your new everyday carry knife.

Easily tackle jobs like:

- Drywall
- Roofing
- Flooring
- Linoleum
- Rubber
- Kevlar®
- Gasket materials and more
